TABLE OF CONTENTS

		PAGE
Studies in the phylogeny of the Betulaceae (with two hundred ninety-eight figures) - - - -	*Ernst C. Abbe*	1
Influence of sulphur deficiency on the metabolism of the soy bean (with two figures) - - -	*Scott V. Eaton*	68
Morphology and physiology of the pome lenticels of *Pyrus malus* (with nine figures) - - - -	*Harry F. Clements*	101
Morphogenetic studies on the inflorescence of cotton (with fifty-three figures) - - - - - -	*Ulys Roy Gore*	118
Histological variations in *Cosmos* in relation to photoperiodism (with twenty-nine figures) -	*Orlin Biddulph*	139
Pennsylvanian flora of Illinois as revealed in coal balls. II (with twenty-four figures) - - - -	*Roy Graham*	156
Cytological studies in the Chenopodiaceae. I. Microsporogenesis and pollen development (with forty-two figures) - - - - - - - - - -	*George Olds Cooper*	169
Origin of the fringe tissue of the cotton seed (with eight figures) - - - - - - - - - - -	*R. G. Reeves*	179
Certain novelties in *Bidens* L. and *Coreocarpus* Benth. (Compositae) - - - - - - - - -	*Earl Edward Sherff*	185
Studies in cellular pathology. I. Effects of cane gall bacteria upon gall tissue cells of the black raspberry (with plate I and one figure) - -	*W. M. Banfield*	193
Developmental anatomy and relative permeability of barley seed coats (with thirty-seven figures)	*W. H. Tharp*	240
Ecological studies on the high plateaus of Utah (with three figures) - - - - - - - - -	*Helen Dixon*	272
Lipase production by *Penicillium oxalicum* and *Aspergillus flavus* - - - - - - - - -	*David Kirsh*	321
A new species of *Calamopitys* from the American Devonian (with plates II, III) - - - - -	*Dale E. Thomas*	334
Macrosporogenesis and development of the embryo sac of *Lilium henryi* (with plates IV, V and nine figures) - - - - - - - - - - - - - - -	*D. C. Cooper*	346

		PAGE
Anatomy of the seedling of *Asparagus officinalis* (with forty-four figures)	*Naomi Mullendore*	356
A method of measuring respiration and carbon fixation of plants under controlled environmental conditions (with five figures)	*John W. Mitchell*	376
Correlation of shape of fruits, cotyledons, and seeds in melons (with eight figures)	*Leslie M. Weetman*	388
Setcreasia brevifolia, a further example of polyploidy and structural hybridity in the Tradescantiae (with seven figures)	*M. Margaret Richardson*	399
Morphology of an internal type of abnormality in the fruit of the pepper (with fourteen figures)	*H. L. Cochran*	408
Microincineration studies. II. Localization of ash-yielding substances during meiosis and its possible significance in x-irradiation phenomena (with four figures)	*Fred M. Uber and T. H. Goodspeed*	416
A cytological monograph of the American species of *Tradescantia* (with thirty-two figures)	*Edgar Anderson and Karl Sax*	433
Effects of nutrient concentration on anatomy, metabolism, and bud abscission of sweet pea (with twenty-one figures)	*G. T. Nightingale and R. B. Farnham*	477
Ratio of water content to dry weight in leaves of the creosote bush (with nine figures)	*Ernest H. Runyon*	518
Growth of fragments of excised root tips (with sixteen figures)	*Wm. J. Robbins, Mary Bartley, and Virginia B. White*	554
Additions to the genus *Euphorbia* L. and to certain genera of the Compositae	*Earl Edward Sherff*	580
Tussock meadows in southeastern Wisconsin (with nine figures)	*David F. Costello*	610
Growth studies in relation to ultraviolet radiation (with thirteen figures)	*B. N. Singh, G. P. Kapoor, and R. S. Choudhri*	649

		PAGE
Effects of barium salts upon *Aspergillus niger* and their bearing upon the sulphur and zinc metabolism of the fungus in an optimum solution	*Robert A. Steinberg*	666
Daily variation in the sensitivity of *Mimosa* with special reference to the action of light (with two figures)	*W. E. Burge, G. C. Wickwire, and H. J. Fuller*	672
Double interlocking of bivalent chromosomes in *Lilium elegans* (with two figures)	*J. M. Beal*	678
Ecological studies in the lower Illinois River valley (with one figure)	*Lewis M. Turner*	689
Hydrotropic responses of roots in soil (with four figures)	*W. E. Loomis and L. M. Ewan*	728
Effects of nitrogen supply on rates of photosynthesis and respiration in plants	*Karl C. Hamner*	744
Grass seedling anatomy: The first internode of *Avena* and *Triticum* (with six figures)	*Lucy Boyd and George S. Avery, Jr.*	765
Forms of *Crataegus pruinosa* (with eight figures)	*H. W. Rickett*	780
Phosphorus relations of lemon cuttings grown in solution cultures (with six figures)	*A. R. C. Haas*	794
Germination of *Populus grandidentata* and *P. tremuloides*, with particular reference to oxygen consumption (with one figure)	*Mildred E. Faust*	808
Chromosome behavior in *Agrostis nebulosa* (with twenty-four figures)	*Fred W. Tinney*	822
Regeneration of *Podostemon ceratophyllum* (with nineteen figures)	*Bayard L. Hammond*	834
The chromosomes of *Sphaerocarpos cristatus* (with twenty-one figures)	*Charles E. Allen*	846
Effect of auxins from some green algae upon *Phytophthora cactorum* (with two figures)	*Leon H. Leonian*	854
Chromosome numbers and electrophoresis of latex in *Asclepias* (with seven figures)	*Laurence S. Moyer*	860
